

1. What is Node.js?
  2. Why is Node.js used?
  3. Is Node.js a language or framework?
  4. What is the difference between Node.js and JavaScript?
  5. What is V8 engine?
  6. What is event-driven architecture?
  7. What is non-blocking I/O?
  8. What is the Event Loop?
  9. What is callback function?
  10. What is callback hell?
  11. What is npm?
  12. What is package.json?
  13. What is package-lock.json?
  14. What are modules in Node.js?
  15. What are built-in modules?
  16. What is require() in Node.js?
  17. What is module.exports?
  18. What is exports in Node.js?
  19. Difference between require and import?
  20. What is CommonJS?
  21. What is ES Module?
  22. What is synchronous vs asynchronous code?
  23. What is process in Node.js?
  24. What is buffer in Node.js?
  25. What is streams in Node.js?
  26. Types of streams?
  27. What is piping in streams?
  28. What is error-first callback?
  29. What is REPL in Node.js?
  30. What is global object in Node.js?
- 

## □ **INTERMEDIATE NODE.JS (31–60)**

31. What is middleware in Node.js (Express)?
32. What is Express.js?
33. Why use Express.js?
34. What is routing in Express?
35. What is REST API?
36. What is CRUD?
37. What is HTTP module?
38. What are HTTP methods?
39. GET vs POST difference?
40. PUT vs PATCH difference?
41. What is status code?
42. 200, 201, 400, 401, 403, 404, 500 meaning?
43. What is authentication?
44. What is authorization?

45. What is JWT?
  46. What is session?
  47. JWT vs Session difference?
  48. What is bcrypt?
  49. What is hashing?
  50. What is encryption vs hashing?
  51. What is CORS?
  52. Why CORS error occurs?
  53. How to fix CORS in Node.js?
  54. What is dotenv?
  55. What is environment variable?
  56. What is nodemon?
  57. What is API middleware?
  58. What is request and response object?
  59. What is body-parser?
  60. What is JSON middleware in Express?
- 

## □ **ADVANCED NODE.JS (61–85)**

61. What is Event Loop in detail?
  62. Phases of Event Loop?
  63. What is microtask queue?
  64. What is callback queue?
  65. What is process.nextTick()?
  66. What is promise in Node.js?
  67. Promise vs callback?
  68. async/await working?
  69. What is concurrency?
  70. What is parallelism?
  71. What is cluster module?
  72. What is worker threads?
  73. Difference between cluster and worker threads?
  74. How Node handles multiple requests?
  75. What is load balancing?
  76. What is scaling in Node.js?
  77. Horizontal vs vertical scaling?
  78. What is stream backpressure?
  79. What is event emitter?
  80. How EventEmitter works internally?
  81. What is garbage collection in Node.js?
  82. What is memory leak?
  83. How to debug Node.js apps?
  84. What is profiling in Node.js?
  85. What is performance optimization?
-

## □ **EXPERT / REAL-WORLD NODE.JS**

### **(86–100)**

- 86. How does Node.js handle large applications?
  - 87. How to structure Node.js project?
  - 88. MVC architecture in Node.js?
  - 89. What is microservices architecture?
  - 90. Monolithic vs microservices?
  - 91. What is Redis? Why used in Node.js?
  - 92. What is caching?
  - 93. What is rate limiting?
  - 94. What is logging in Node.js?
  - 95. What is Winston / Morgan logger?
  - 96. How to secure Node.js application?
  - 97. What are common security vulnerabilities (XSS, CSRF)?
  - 98. What is helmet middleware?
  - 99. How to deploy Node.js app?
  - 100.       Difference between Node.js and Deno?
-
